# MONOCORE

*With the same colour decorative surface as the core layer, Monocore gives a uniform look to any surface you choose.*

## CenturyLaminates brings to you MonoCore

Ideal for your retail and commercial spaces, they ensure that while your interiors look sharp, the edges between two laminates are smooth.

One of the few limitations of high pressure laminates is a joint. MonoCore eliminates this concern with a range of solid colour designs which infuse the material throughout its entire thickness, removing the shadow line effect.

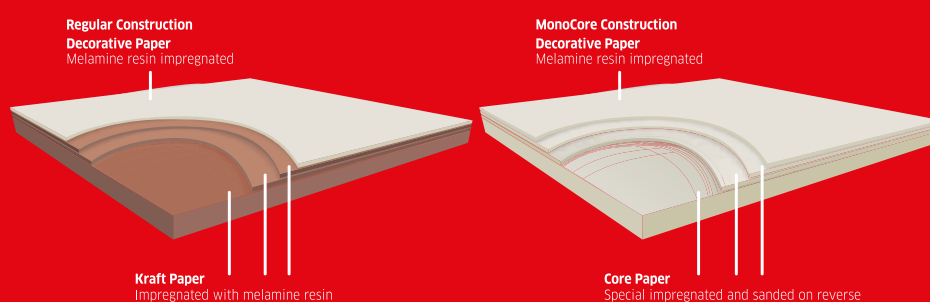

MonoCore comes in 10 contemporary solid shades and are available in two finishes, Gloss and Suede.

### Product Composition

These high quality laminates have the same colour decorative surface as the core layer, giving them a uniform look.

CenturyLaminates' MonoCore is produced using a unique technology. These laminates are made of a single design paper, the reverse of which is sanded.

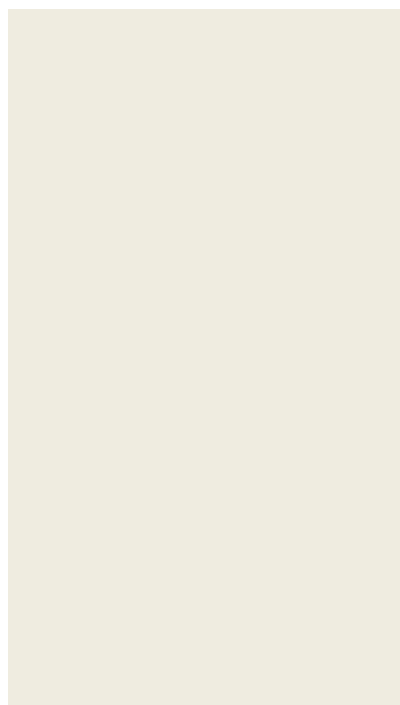

The decorative side is treated using melamine resins, while the core paper layer is impregnated with special resin to maintain uniform colour on the edges.
